

Energy policy KÖNIG + CO. GmbH

As a company certified according to ISO 50001, KÖNIG + CO. GmbH is committed to the responsible use of energy. Our energy policy is a central component of our corporate strategy, combining climate protection, energy efficiency, and economic responsibility. By implementing our energy management system, we not only meet legal requirements but also act out of conviction: We aim to use energy sustainably to ensure that we can continue to offer our high-quality products economically in the long term.

Our strategic objectives are clearly defined: We strive for the continuous improvement of energy efficiency and the reduction of energy consumption. At the same time, we promote awareness of sustainable energy use among all employees and provide the necessary resources to achieve these goals. Through targeted measures and regular reviews, we ensure transparent and efficient energy use.

Concrete energy targets include reducing energy consumption through the continuous modernization of our machinery, optimizing gas consumption, and expanding our measurement technology. These measures enable us to better control energy flows and identify potential for further savings. Our progress is regularly reviewed and evaluated through internal and external audits.

KÖNIG + CO. GmbH views energy efficiency as an active contribution to climate protection and as an opportunity to strengthen our competitiveness. Despite external challenges such as political uncertainties or market changes, we invest in innovative technologies and continuously work on the further development of our energy management.

Our promise: We act responsibly, for our employees, customers, all our stakeholders, and the environment. Through transparency, innovation, and commitment, we are shaping a sustainable and future-proof company.
