

## Quality policy KÖNIG + CO. GmbH

As a company certified according to ISO 9001:2015, quality is at the heart of everything we do, as it is the only way to sustainably meet our customers' expectations. With a certified quality management system and compliance with standards such as the Pressure Equipment Directive 2014/68/EU and ASME certifications, we ensure reliable, safe, and market-oriented solutions. Our goal is not only to meet but to exceed expectations through continuous improvement and preventive error avoidance. This is how we build trust and long-term partnerships.

Customer satisfaction is our top priority: We develop products and services that function reliably throughout their entire lifecycle, offering an optimal price-performance ratio. Through systematic risk analysis and targeted measures, we minimize sources of error and ensure on-time deliveries. At the same time, we regularly adapt our system to new requirements to stay up to date.

Sustainability and responsibility are indispensable to us. We rely on resource-efficient processes that go beyond legal requirements and promote awareness of environmental protection and occupational safety among all employees. Through training and clearly defined responsibilities, we ensure that quality, safety, and environmental protection are practiced daily.

Our core values shape our actions: Inspire customers, act as partners, embrace challenges, pool expertise, be committed, take responsibility, exemplify quality, avoid errors, improve existing processes, and foster ideas. These values guide us, as quality is the result of commitment and teamwork, not coincidence.

Our quality claim is based on customer satisfaction, continuous improvement, and sustainability. As a certified company, we are committed to excellence, transparency, and responsibility. With clear values, we inspire our customers and stakeholders, lead by example in quality, and avoid errors. This is how we combine economic goals with ecological and social responsibility. For a better future.
